

## CSI31 Lecture 24 The LAST Lecture

### *Chapter 10. Defining Classes*

Let's write a program that emulates students and courses.

#### **Student class has:**

name

id#

#### **Student class can:**

enroll into a course

drop a course

print out the name of the student

#### **Course class has:**

name

section #

instructor's name

#### **Course class can:**

add a student to the roster

remove a student from the roster

print out the roster of students
